

AMINE SELLALI

Software Engineer – Fullstack Development – Open to VIE
+33 7 70 37 44 74 | aminesellali@outlook.com

Software engineer with a Master’s degree in Embedded Systems, experienced in Python backend and fullstack development. Strong interest in software quality, APIs, and scalable systems, seeking a VIE in an international tech environment.

EDUCATION

University School of Management Master’s Degree in Business Management (MAE) Relevant coursework: HR Management, Accounting, Strategy, Negotiation, Project Management	Lille, France Sep 2024 - Aug 2025
Polytech Lille – Graduate School of Engineering, University of Lille Master’s Degree in Embedded Systems Engineering Relevant coursework: Embedded Software, Microelectronics, Control Systems, Networking	Lille, France Sep 2021 - Aug 2024
Lycée Baggio – Preparatory Classes for French Engineering Schools (CPGE) Specialization: Physics, Technology and Engineering Sciences intensive coursework in mathematics, physics, and engineering sciences to prepare for national competitive exams for top engineering schools.	Lille, France Sep 2021 - Aug 2024

PROFESSIONAL EXPERIENCE

Amaris Consulting – Fullstack Developer - Developed internal web applications for operational teams using Python (Django) - Designed and implemented CRUD interfaces using HTML, CSS, and JavaScript - Contributed to backend logic, database models, and user interface improvements	Strasbourg, France June 2025 - now
Capgemini – Fullstack Developer Intern - Developed and maintained enterprise-level applications for a luxury industry client - Built backend services in .NET, Node.js and frontend components with ReactJS - Participated in Agile/Scrum ceremonies and collaborated with a cross-functional team - Diagnosed and resolved application issues, improving support response time	Lille, France Fab 2024 - Aug 2024
Aerospace Embedded Solutions (AES) – Software Engineering Intern - Developed a software platform to centralize technical and architectural documentation for embedded systems - Implemented system architecture using MathWorks System Composer - Coordinated with MathWorks engineers to integrate the solution and deliver user training	Munich, Germany May 2023 - Aug 2023

PROJECTS

Task Management REST API - Developed a RESTful backend using Django and Django REST Framework - Created models, serializers, and views for CRUD operations - Used Postman to test and validate endpoints (GET, POST, PATCH, DELETE) - Deployed with a relational database and automatic timestamping

LANGUAGES	TECHNICAL SKILLS
- French: Native - English: Fluent (C1) - Spanish: Intermediate	- Languages: Python, Java, C#, JavaScript, HTML, CSS - Frameworks & Libraries: .NET, Django, React, Node.js - Databases: MySQL, PostgreSQL, Oracle - Tools: Git, Postman, Jenkins, Visual Studio Code
